

# Claude Design: How-To Guide

*5 Simple Steps To Getting Started With Claude Design*

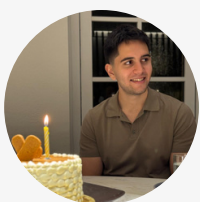

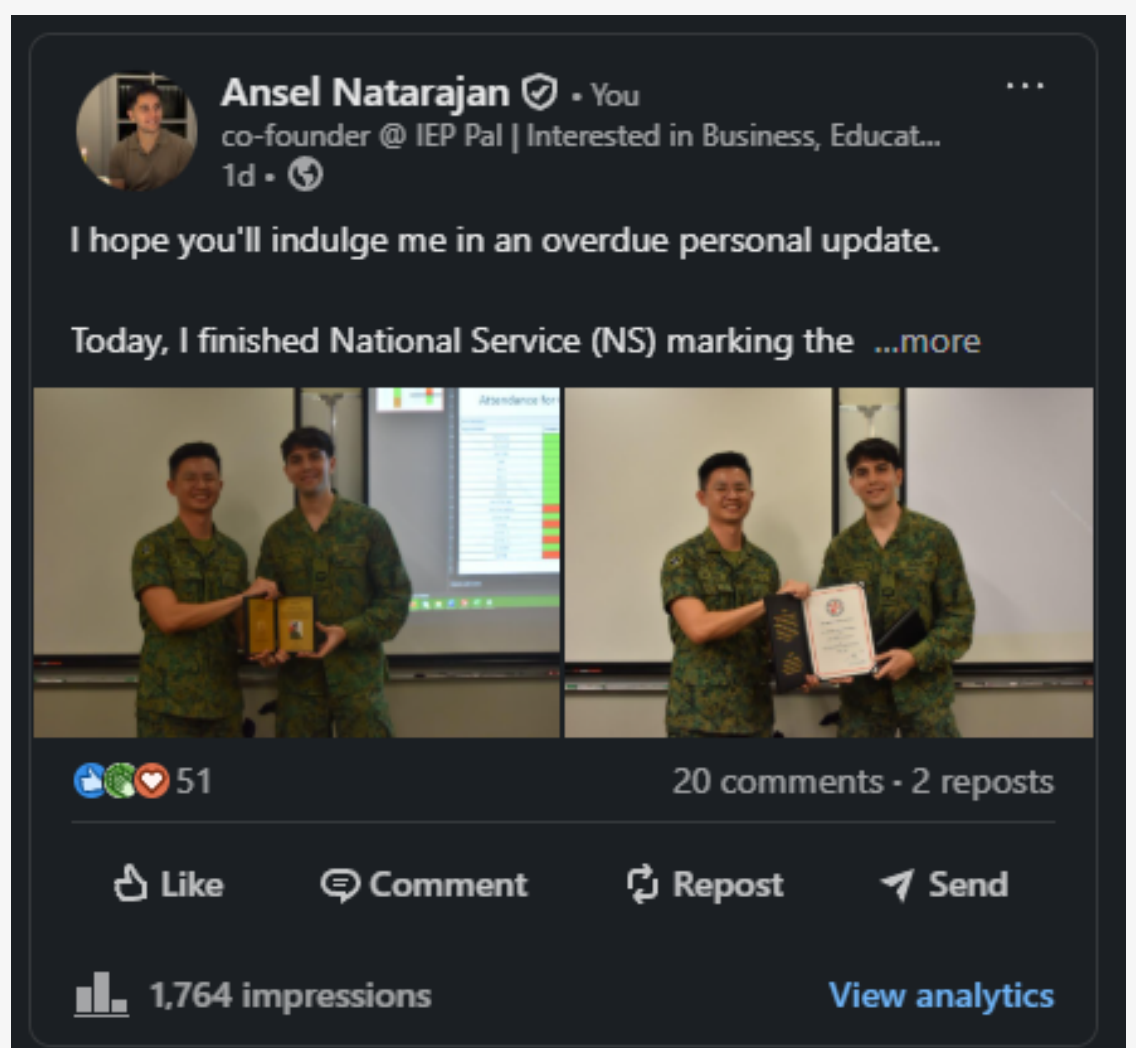

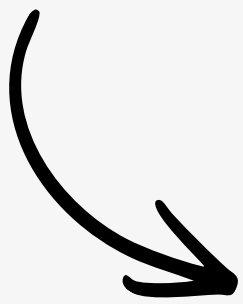

Ansel Natarajan  
iep-pal.com

# Gather Materials

*If you have marketing materials, great! If not, don't worry – gather whatever you have. For us that looks like:*

- **LinkedIn Posts, Newsletters, & Carousels**
- **Your Website (ex. iep-pal.com)**
- **IEP Pal Software**

Ansel Natarajan  
iep-pal.com

# Download These

*Install Desktop App,  
Claude Cowork.*

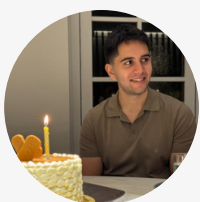

Visual Studio Code  
(VsCode)

*Install Desktop App.  
This will help us view  
files later on!*

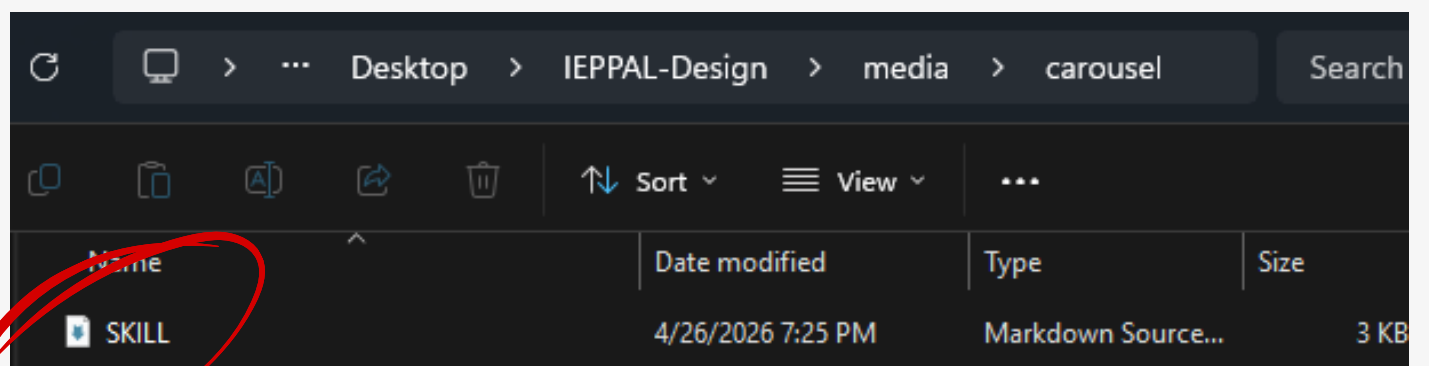

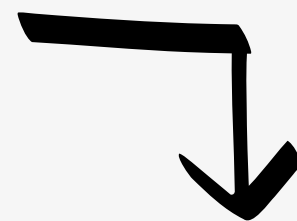

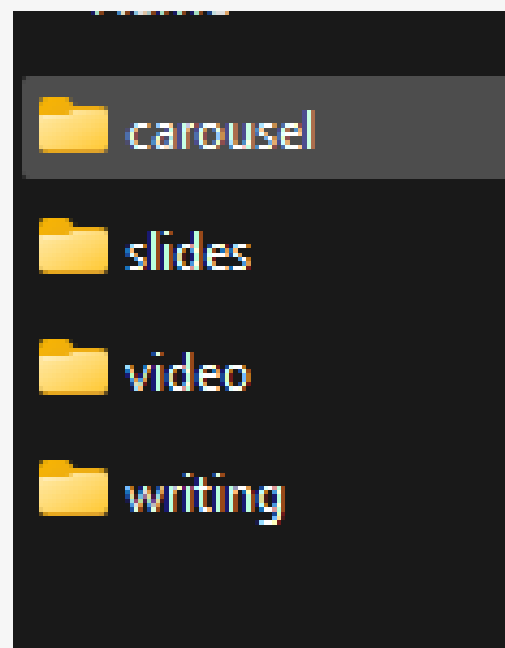

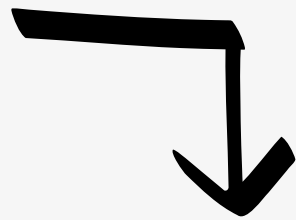

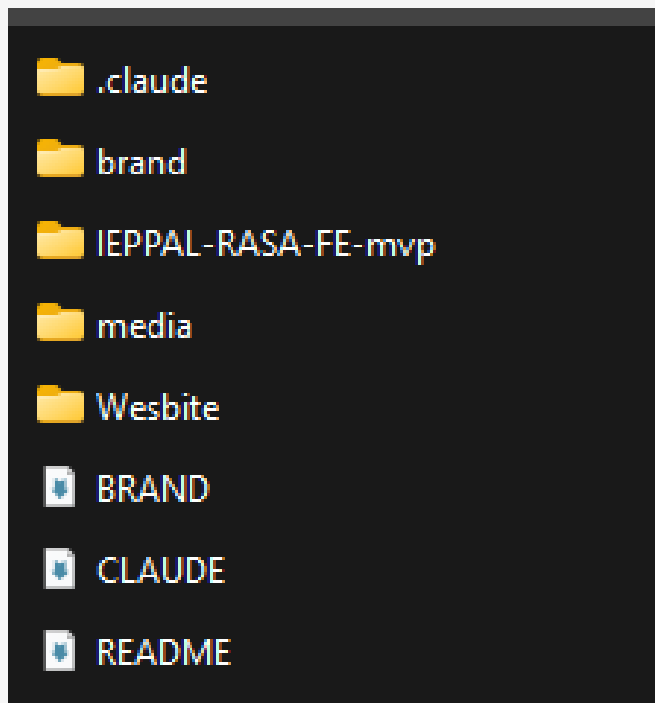

*Once in VSCode, go to Extension  
on the sidebar and install Claude*

# Build Your Folders

*This is what most people miss. Build folders for specific use cases. Do this just on your desktop!*

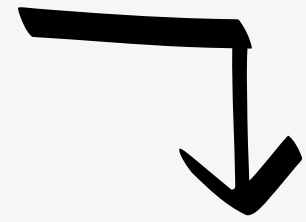

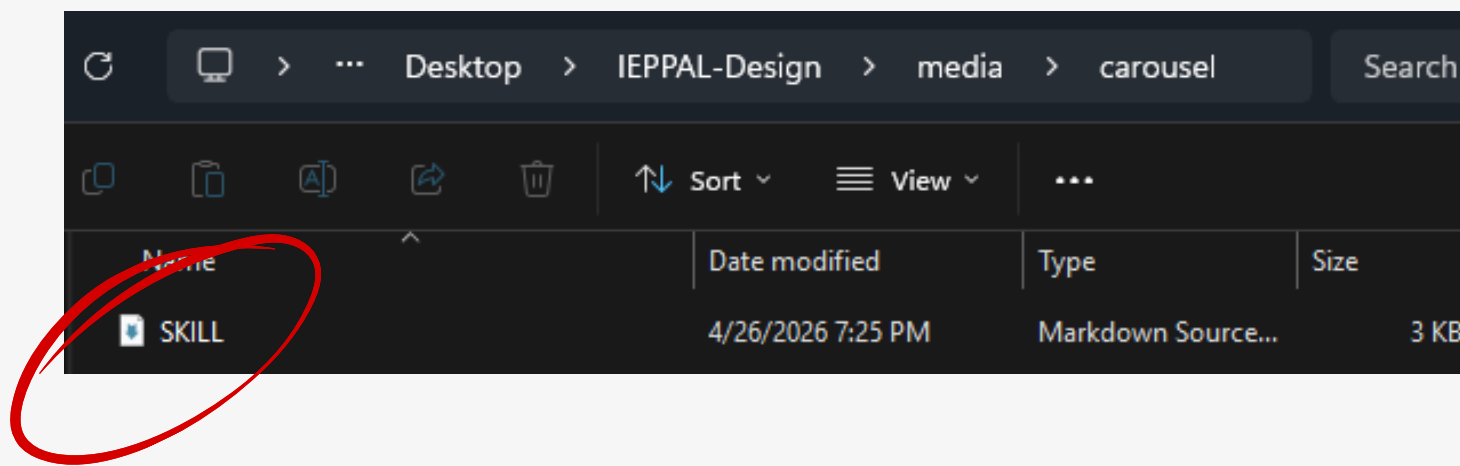

*See next step!*

# Build Claude Skills

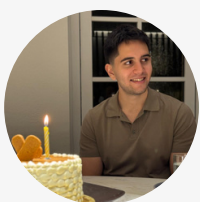

*Every use case should have a **Skill.md** file.*

*These are the instructions for Claude.*

***Pro Tip:** Use Claude to help build these Skill.md files (.md just means its a basic text file!)*

```
1 |--
2 |  name: ieppal-carousel
3 |  description: STUB - not yet shipped. Build me out before using. Purpose is to generate on-brand IEP Pal
4 |  LinkedIn carousels (PDF or image set) with the right colors, fonts, and voice, sized correctly for
5 |  LinkedIn's document/carousel viewer.
6 |  ---
7 |  # IEP Pal LinkedIn Carousel - Skill Stub
8 |  > **Location:** `IEPPAL-Design/media/carousel/SKILL.md`
9 |  > ...
10 | > IEPPAL-Design/
11 | >   media/
12 | >     carousel/
13 | >       SKILL.md + you are here
14 | > ...
15 | > For the full folder structure see `IEPPAL-Design/CLAUDE.md`.
16 | > **Status:** stub. Do not use this skill as-is.
17 | ---
18 |
19 | ## Context
20 |
21 | **Always load:**
22 | - `BRAND.md` - colors, typography, illustration assets
23 | - `brand/voice/SKILL.md` - voice & tone for all copy
24 |
25 | **When based on existing writing (load the source piece only):**
26 | - `media/writing/03-final/[filename]`
27 |
28 | **Do not load:**
29 | - `media/slides/`, `media/video/`, `media/writing/01-ideas/`, `media/writing/02-drafts/`
30 | - `IEPPAL-RASA-FE-mvp/`, `Website/`
31 | ---
32 |
33 | ## What this skill will do once built
34 |
35 | Generate LinkedIn carousels as a multi-page PDF (the format LinkedIn actually renders as a swipeable
36 | carousel) or a sequence of images, on-brand by default.
37 |
38 | - 1080 x 1350 (4:5) per slide - the size LinkedIn crops best to
39 | - 8-12 slides ideal
40 | - First slide: hook + name the problem. Last slide: soft CTA (follow, book demo, share).
41 | - Middle slides: one idea each. Big Playfair headline + short Inter body.
42 | - One pastel accent per carousel (pick based on topic: sunshine for encouragement, mint for privacy, sprout
43 |   for progress/growth stories).
```

*Provide Claude Examples in the folder itself, so it can be used as context!*

# Claude Design

## *Sign into Claude Design (Web Browser)*

Create a design system so anyone can create good-looking designs and assets.

**Set up design system**

## *Upload Your Folder System!*

Company name and blurb (or name of design system)

e.g. Mission Impastabowl: fast-casual pasta restaurant with in-store touchscreen kiosk, mobile app and website

**Provide examples of your design system and products (all optional)**

What works best: code and designs for your design system and your code products.

Link code on GitHub

Add

Link code from your computer

Drag a folder here or [browse](#)

This doesn't upload the whole codebase; Claude will copy selected files. For large codebases, we recommend attaching a frontend-focused subfolder.

Upload a .fig file

Drop .fig here or [browse](#)

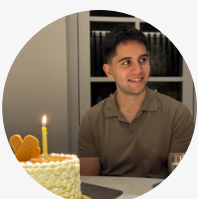

Parsed locally in your browser — never uploaded. [Learn how to get a .fig file](#)

Add fonts, logos and assets

Drag files here or [browse](#)

Any other notes?

e.g. We use a warm, earthy color palette with rounded corners. Our brand voice is playful but professional...
